Assistant Professor of Mathematics

**SUMMARY:** The Department of Mathematical Sciences at the University of Alaska Anchorage invites applications for a tenure track Assistant Professor of Mathematics position starting in August 2011. The salary and benefits are competitive, and excellence in teaching and research is essential. The department seeks candidates whose research interests are compatible with those of current department faculty or with other collaborative research activities at the university. The Department offers undergraduate studies in mathematics, statistics, and computer science, has 18 full time faculty members (www.math.uaa.alaska.edu), serves an energetic and growing campus of 15,000 students, and is located in the stunningly beautiful city of Anchorage (www.travelalaska.com, www.anchorage.net, www.alaska.gov).

**QUALIFICATIONS:** The successful candidate must have an earned doctorate in mathematics upon appointment, along with evidence of a strong commitment to teaching and a demonstrated potential for research. Excellent communication skills and experience with innovative teaching technologies are expected. Responsibilities include teaching, research scholarship, and service; teaching duties will include both introductory and advanced undergraduate courses.

**APPLICATION PROCESS:** Applications must include: 1) a cover letter summarizing the applicant’s employment interest and qualifications, 2) a curriculum vitae, 3) three professional reference letters addressing both teaching and research qualifications, 4) a teaching philosophy statement, 5) evidence of research scholarship, and 6) copies of all collegiate transcripts. Reference letters must include originator’s name, title, and contact information. All application materials except reference letters and transcripts must be submitted via the link below. Transcripts and reference letters may be submitted electronically or mailed directly to the Search Committee Chair (link and address are provided below). To ensure full consideration, an application should be submitted by January 14, 2011, but applications will be accepted until the position is filled or the search is terminated. Review of applications begins on January 17, 2011. Finalists must submit official transcripts and comply with institutional hiring policies.
