Initially use a Singleton.

instance of the MDI window between the different calls, we
use process threads to access this one instance and maintain
instances of this window, but wanted to allow many differ-
ent interface (window for an application and wanted only one
instance). For example, we had a main MDI (multiple docu-
ment)

Figure 2.1.3 UML for Singleton pattern

The Singleton pattern has one main component: the Single-

What is a Singleton Pattern?

Singleton Pattern
